

VACCINE FREEZERS

Stay within range with a purpose-built freezer for critical supplies.

Choose a freezer that virtually eliminates vaccine losses by maintaining stable temperatures for up to four days during power outages. The TempArmour vaccine freezer (Model BFFV15) delivers unmatched temperature stability and uniformity using phase-change material (PCM) cooling technology.

Up to 4 Days of Outage Protection

Lower Total Cost of Ownership

Reliable Storage for Small Spaces

Reduced Cold-Chain Incidents

Stable Daily Temperatures

Meets CDC and Vaccines for Children Requirements

Features

Minimize supply loss, monitoring, and stress with the TempArmour freezer, purpose-built to keep temperatures within the required -50°C to -15°C range during an outage for **four days**.

- ✓ PCM lining for uniform temperatures
- ✓ Chest configuration traps cold air
- ✓ No backup power needed
- ✓ Comprehensive organization system
- ✓ Exceptionally low power consumption
- ✓ No scheduled maintenance required
- ✓ Holds more than 1,000* vaccine or medicine doses
- ✓ Compact size (26.5" x 25" x 31")

*100 boxes of 10 x 0.5 ml vials (based on typical manufacturer box sizes)

"A few times, our clinics had lost power, and nobody had to run to the clinic in the middle of the night. The temperature stayed within range."

Theresa D.

Worry-Free Temperature Control When It Counts

Ensure vaccines and medicines that can or need to be frozen stay within range with TempArmour's medical-grade freezer and innovative PCM technology.
