

MEDICAL COOLERS

Leverage innovative technology for temperatures that stay in range during transport and for off-site or emergency care.

TempArmour medical coolers are lab-qualified and designed with phase-change material (PCM) and vacuum-insulated panel (VIP) technology to deliver better cold-chain protection.

Up to 3 Days of Cold-Chain Protection

Count on days of stable temperatures within the refrigerated (2-8°C) or frozen (-50 to -15°C) temperature range.

8 Hours of Stability for Open-and-Close Use

Reduce supply loss with 8+ hours of temperature control when the cooler is opened and closed.

Secure, Ergonomic Design

Travel worry-free with features including a lightweight cart, durable carrier material, and easy access options.

Versatile and Effective

Provide reliable medical-grade storage and transport for vaccines, blood, medicine, and more with no ice packs or electricity required.

TempArmour Medical Cooler Model VCT-4 (Refrigerated Temperatures)

Tap into worry-free cold storage transport with the TempArmour medical cooler, which keeps temperatures within a 2°C to 8°C range during an outage for **three days** when the cooler is kept closed.

- ✓ Six PCM panels for uniform temperatures
- ✓ Infrared laser (IR) thermometer (to measure panel temperature prior to packing)
- ✓ Ergonomic design features for easy transport and access
- ✓ Additional storage for data loggers, documents, and personal items
- ✓ Holds more than 500* vaccine or medicine doses

- ✓ ISO 17025-calibrated data loggers available for ongoing temperature monitoring (not included)

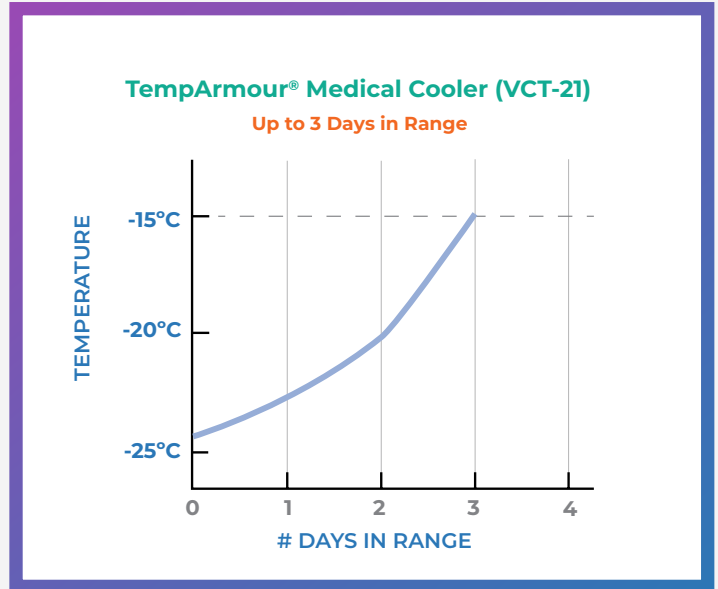

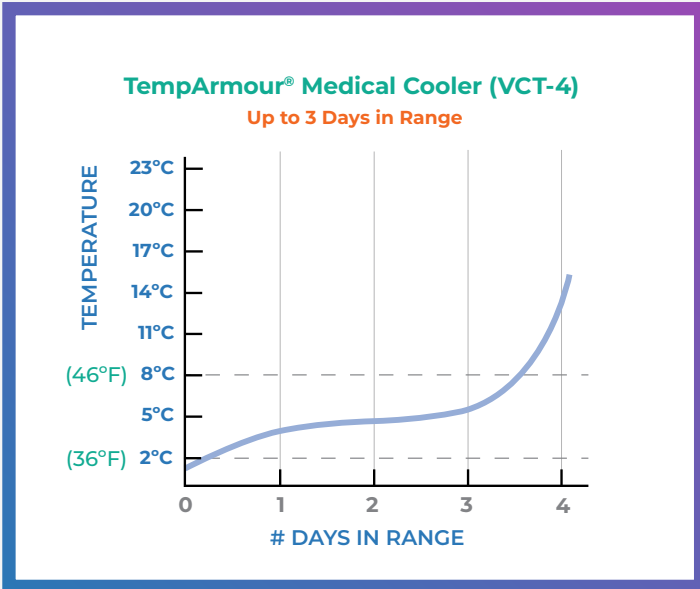

** 500 x 0.5 ml vials or 120 single dose syringes (based on typical manufacturer box sizes)*

TempArmour Medical Cooler Model VCT-21 (Frozen Temperatures)

The VCT-21 model includes the same features as the VCT-4 and uses **the same lab-qualified PCM and VIP technology** to maintain a -50°C to -15°C temperature range for up to **three days**.

3 Days of Effective Outage Protection

"We have received 2 VCT-4 coolers. It maintains the temperature for a continuous 8 hours, and we are really happy with your service and product."

Shruti P.

A Medical Cooler That Goes the Distance

Use a lab-qualified solution to transport supplies and support your emergency preparedness plans.
